

BIOCULTURAL DIVERSITY AND INDIGENOUS WAYS OF KNOWING: HUMAN ECOLOGY IN THE ARCTIC

by Karim-Aly S. Kassam

ISBN 978-1-55238-566-1

THIS BOOK IS AN OPEN ACCESS E-BOOK. It is an electronic version of a book that can be purchased in physical form through any bookseller or on-line retailer, or from our distributors. Please support this open access publication by requesting that your university purchase a print copy of this book, or by purchasing a copy yourself. If you have any questions, please contact us at ucpress@ucalgary.ca

Cover Art: The artwork on the cover of this book is not open access and falls under traditional copyright provisions; it cannot be reproduced in any way without written permission of the artists and their agents. The cover can be displayed as a complete cover image for the purposes of publicizing this work, but the artwork cannot be extracted from the context of the cover of this specific work without breaching the artist's copyright.

COPYRIGHT NOTICE: This open-access work is published under a Creative Commons licence.

This means that you are free to copy, distribute, display or perform the work as long as you clearly attribute the work to its authors and publisher, that you do not use this work for any commercial gain in any form, and that you in no way alter, transform, or build on the work outside of its use in normal academic scholarship without our express permission. If you want to reuse or distribute the work, you must inform its new audience of the licence terms of this work. UNDER THE CREATIVE COMMONS LICENCE YOU **MAY**:

- read and store this document free of charge;
- distribute it for personal use free of charge;
- print sections of the work for personal use;
- read or perform parts of the work in a context where no financial transactions take place.

UNDER THE CREATIVE COMMONS LICENCE YOU **MAY NOT**:

- gain financially from the work in any way;
- sell the work or seek monies in relation to the distribution of the work;
- use the work in any commercial activity of any kind;
- profit a third party indirectly via use or distribution of the work;
- distribute in or through a commercial body (with the exception of academic usage within educational institutions such as schools and universities);
- reproduce, distribute, or store the cover image outside of its function as a cover of this work;
- alter or build on the work outside of normal academic scholarship.

ACKNOWLEDGMENTS

A narrative becomes interesting when more than one individual is involved. This is certainly true for this work. The research contained within these pages would not have been possible without the support and participation of civil society institutions and individual members of the Arctic communities of Lovozero, Murmansk Oblast, Russia; Ulukhaktok (Holman), Northwest Territories, Canada; and Wainwright, Alaska, USA. I am indebted particularly to the Kola Sami Association, the Ulukhaktok Hunters and Trappers Committee, and the Wainwright Traditional Council for their advice and support. Recognizing and valuing sources is not only a tradition found among native peoples but an ethical responsibility that illustrates the diversity and depth of knowledge found in indigenous communities. Some of these individuals have passed on by the time this work has come to press. Their contribution is a testimony to knowledge of those who preceded them and those who will follow. Specific contributions by indigenous knowledge holders to Chapter 4, “Man and His Friends – An Illustrative Case of Human Ecology in Ulukhaktok,” were made by: Winnie Akhiatak, Andy Akoakhion, Sharon Alanak, Christine Bristow, Harry Egotak, Rosie Egotak, Mark Ekootak, Agnes Goose, Bessie Inuktalik, Allen Joss, Jack Kataoyak, Jamie Kimiksana, Betty-Ann Koplomik, Jimmy Kudlak, Mary Kudlak, Ida Kuneyuna, John Kuneyuna, David Kuptana, Frank Kuptana, Robert Kuptana, Susie Malgokak, Roberta Memogana, Brian K. Moss, Elsie Nilgak, Donald Notaina, George Okheena, Ruby Okheena, Walter Olifie, Rene Oliktoak, Sam Oliktoak, Peter Palvik, and Mary Uyaraktek. Contributions by indigenous knowledge holders to Chapter 5, “The Weather is Going Under – Human Ecology, Phronesis, and Climate Change in Wainwright,” included: George Agnasagga, Gene Aguvluk, Raymond Aguvluk Jr., David Ahlalook, Barry Bodfish, Homer Bodfish, Billy Nashoalook, Charles Naya-kik, Billy Blair Patkotak, Blair Patkotak, Rossman Peetook, Noah Phillips, Glen Shoudla, Gregg Tagarook Sr., Terry Tagarook, and Harry Tazruk.

Students are not only consumers of information but also producers of insight. Many undergraduate and graduate students participated in my research projects, not all of whom can be named here. Specifically, student research assistants Darwin Bateyko, Jennifer Cardiff, Sean Maher, Bonnie

McCluskey, Ciara McNiff, and Hugh Moloney, all of whom made contributions to research in Ulukhaktok and Wainwright, are worthy of mention. Susanne Cardwell, Yvonne Poitras-Pratt, and Everett Wilson reviewed earlier drafts as they explored their own research interests in biocultural diversity.

Unlike capital, which is valued when it is accumulated, knowledge is valued when it is shared. I am deeply indebted to David L. Brown, Davvyd J. Greenwood, James P. Lassoie, Derek Muir, George Melnyk, David W. Norton, Todd O'Hara, Michael Robinson, and Joseph B. Yavitt. Each of them consistently and with generosity devoted precious time to engage in thoughtful discussion. These pages reflect the outcome of that engagement. My interactions with them were imbued with the spirit of sharing of ideas found among committed scholars.

Support while writing was provided through fellowships from the Organization of American States – Fulbright Ecology Initiative, and the Social Sciences and Humanities Research Council of Canada. Research funding for the particular case studies was provided by the Cooperative Institute for Arctic Research (CIFAR), supported by the National Oceanic and Atmospheric Association; Human Dimensions of the Arctic System (HARC), supported by the National Science Foundation; and the University of Calgary Gorbachev Foundation (UCGF). I am also grateful for the support of the Department of Natural Resources and the American Indian Program in the College of Agriculture and Life Sciences at Cornell University and the Faculty of Communication and Culture at the University of Calgary.

I am also appreciative of the staff of the University of Calgary Press involved in the production of this work under the leadership of Director Donna Livingstone, as well as the anonymous reviewers who provided valuable and useful suggestions.

Over the past fifteen years, and particularly during the composition of this work, there were particular challenges to my health. The team of medical doctors deserve credit for their promptness, care, and expertise. Special thanks are due to Frank D. Collette, general practitioner, who has been by my side since I was a child; Joseph Warshawski and Ian Parney for great surgical skills; and David Hanley and Susan Kinnear, whose vigilance ensured continued good health. I am ever so grateful to all the nurses whose care

was characterized by tenderness and attentiveness. I cannot find a more compelling case for a universal medical care system for all the citizens of a country than the proof of my own continued existence.

Alas, those whom I live for – Yasmin, Tahera-Rafia, and Sinan-Saleh – have sacrificed much and given much to make this work possible. I cannot heave my heart onto my tongue to express the depth of my love for them.
